题目

E02733 : 判断闰年

<http://cs101.openjudge.cn/pctbook/E02733>

```
a = int(input())

def is_leap_year(year):
    if year % 4 == 0:
        if year % 100 == 0 and year % 400 != 0:
            return "N"
        else:
            return "Y"
    else:
        return "N"

print(is_leap_year(a))
```

代码运行截图 (至少包含有"Accepted")
